## We Can Make Your Shaving Easier

Shaving in the modern way—with modern utensils—is a real pleasure rather than a nuisance.

However, even some of the latest shaving devices are not a big improvement over the old. But we are in position to know which are the most worthy, as we have had an opportunity to investigate them all.

We tender you a most hearty invitation to inspect our worthy assortment of razors—strops—hones—blades—brushes—soaps in all forms—soothing ointments—etc.

## CAULIFLOWER IN FAVOR

Vegetable Is Closely Related to the Cabbage Tribe.

Very Rich Soil Required, and It Must Be Given Most Particular Treatment—Market Demands Snowy White Heads.

Cauliflower is closely related to the cabbage tribe, but much more refined in its habits and more difficult to cultivate. It requires a very rich soil and the most particular treatment, and no farmer or gardener would be justified in attempting its cultivation on a large scale, or to depend upon it as a market crop without first having thoroughly studied its peculiarities and requirements.

The market desires snowy white heads, so that protection is universally practiced to accomplish this purpose. Three methods are used: (1) The breaking of half a dozen or more leaves over the top of the cauliflower head. The stems of the leaves are not severed entirely, so that the leaves remain green. (2) Breaking or bending over the leaves as just explained, and pinning with toothpicks or small pins. This is a very satisfactory method for all sections. (3) Bringing the leaves together over the head and tying. This is an excellent plan, but requires more time than securing with the toothpicks. The protection should begin when the heads are about an inch and a half in diameter.

Cauliflower is considered a delicacy on most tables, and it pays to exercise special care in the marketing. Although barrels are often used, crates or baskets are better. A package which will not hold more than a dozen or at most two dozen heads certainly has an advantage over the barrels.

If the heads are of good size, snowy white, wrapped in fancy paper, and marketed in new, clean packages they cannot fail to attract attention, and command good prices.

## AUTUMN DEMAND FOR CELERY

Tendency to Rush Product to Market Before It Is Well Blanched—Loss in Trimming.

The bracing fall weather will stimulate the demand for celery. At this season when it is selling readily at good prices, there is a tendency to rush celery to market before it is well blanched. This is a mistake, because it necessitates severe trimming at the market end, and the product goes to the cheaper trade. To catch the best grade, celery must be fully blanched, clean and well trimmed.

"Handling" celery should be finished promptly and the rows ridged as fast as possible. If the soil is allowed to get into the hearts of the plants it will cause rot. Celery intended for storage should not be ridged. In some quarters there is a prejudice against blanching celery with boards. It is claimed that blanching with earth makes it crispier and gives it a better flavor. Just the same, much of the product grown in various parts of the country is blanched with boards, and it sells for top prices, too.

## POTATO GATHERER IS HANDY

Mechanism Is Placed on Forward End of Frame of Device—Conveyor Carries Potatoes.

Wisconsin is coming to the front as a potato state, and as a standardized variety potato state that uses pedigree seed it leads them all. Naturally, potato interests are receiving the attention of inventors more or less in that state. Here we are showing a drawing of a recent patent of a potato gatherer by a Louisburg (Wis.) man. The gathering mechanism is placed in the forward end of the frame that is pivoted on a wheeled axle, a conveyor for carrying the potatoes back to the rear from the gathering mechanism being also carried. The frame carries fingers of unequal length, placed successively long and short, and directed forward over the conveyor. A second conveyor is mounted on the frame above the first one, the upper one carrying transverse rake bars.—Farming Business.

## MANURE APPLIED IN GARDEN

Fresh Fertilizer Induces Rank Growth of Stem and Leaf—Yield Is Greatly Reduced.

Barnyard manure is good for the garden if applied at the right time, but there are times when its application is harmful. Fresh manure, when applied immediately before planting, cannot be thoroughly incorporated with the soil. As a result the land is hard to work and the ground is loose instead of compact. Fresh manure also induces a rank growth of stem and leaf, and as a result of these factors, the yield of most vegetables is greatly reduced.

## HOPKINSVILLE EVIDENCE FOR HOPKINSVILLE PEOPLE

The Statements of Hopkinsville Residents Are Surely More Reliable Than Those of Utter Strangers.

Home testimony is real proof. Public statements of Hopkinsville people carry real weight.

What a friend or neighbor says compels respect.

The word of one whose home is far away invites your doubts.

Here's a Hopkinsville woman's statement.

And it's for Hopkinsville people's benefit.

Such evidence is convincing.

Mrs. J. E. O'Daniel, 603 O'Neal St., Hopkinsville, says: "I suffered from pains in my back and sides and other troubles caused by weak kidneys. Doan's Kidney Pills quickly cured me. I know that they are the best kidney medicine to be had. I often advise friends and acquaintances to give Doan's Kidney Pills a trial."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. O'Daniel had. Foster-Milburn Co., Props., Buffalo, N. Y.

## An Unfortunate Beginning.

A young miner got married, and for the first week's housekeeping expenses he gave his wife the good round sum of \$1. The girl, to his surprise, accepted the dollar cheerfully, and that week they lived abundantly enough, albeit plainly. So, for the second week, the miner doled out only half a dollar. Then his wife went for him. She told him what she thought of his meanness. The house reverberated with her indignation. The miner, in the midst of the storm, clapped on his hat and stalked out, muttering: "I see what the matter here. I spoiled ye the first week."—Philadelphia Ledger.

## ONE DISADVANTAGE OF ARMOR

English Princess Thought That It Would Be Hard on Furniture.

When Princess Mary was quite a little girl the queen took her one day to the Tower of London, and was very anxious that she should understand the historical associations of the place. In the course of their tour the royal party came upon a particularly fine suit of armor with spiked helmet, spikes on the knees and spurs.

Thinking to impress the princess with the chivalry of those days, says Pearson's Weekly, her majesty said, "This, Mary, is a suit of armor that used to be worn by the knights. What do you think of it?"

For a time the princess remained silent, while she seemed to be thinking deeply.

"Perhaps it was all right," she said at last doubtfully; "but can't you imagine how awfully it must have scratched the furniture?"

For croup or sore throats, use Dr. Thomas' Eclectic Oil. Two sizes, 25c and 50c. At all drug stores.—Advertisement.
